EXPERIENCE

Improving, Atlanta GA — *Consultant*

March 2021 - PRESENT

Front-end developer specializing in TypeScript, SCSS, and modern JavaScript frameworks. Mentored team members in SCSS styling and layout as well as TypeScript logic and function.

Internal Website:
Led the development of our company's new SEO-oriented website. This React / Next TypeScript app was developed from the ground up to be a showcase of what our company could do.

Checkout Application:
Led the development of a large-scale public-facing front-end application using TypeScript and Angular with Material styling.

Component Library and NPM package:
Designed and developed a full stack, internal Angular component library allowing team members to efficiently implement reusable components from a central location.

Voith Paper, Austell GA—Mechanical Engineer Co-Op

December 2019 - December 2021

Utilized Microsoft Access to create project Databases. Learned and used VBA and SQL to build databases for inventory tracking, safety training, job education, and work instruction.

Fitness Together, Atlanta GA—Personal Trainer

May 2017 - December 2019

PROJECTS AND INTERESTS

Animal Rescue, Foster and Volunteer
Animal welfare advocate, foster, and co-founder for The Kitten Rescue Project, a local non-profit rescue.

Rescue's Website:

Developed the home website for TKRP, a 501c3 non-profit specializing in neonatal kittens. https://thekittenproject.org/
